Hello, everybody. My name is Rowena Stewart. I am one of the Academic Support Librarians and I'm Academic Support Librarian for Health in Social Science which is why I am narrating these slides. And one of our jobs is to try and help people get the most out of the library resources that the University buys and these slides are for you now and to also refer back to when you start doing your systematic reviews and will hopefully help you think about your workflow, a bit about the search terms and how you might come up with them and how to combine them but also some database tips which will maybe speed things up or help you when you come to do the review.

The slides you will be able to refer back to of course but also I'm very happy to take questions and to arrange to meet or to talk to folk at the time when it becomes most useful to you to do that. My contact details are here and on a later slide as well.
