

# Media Hopper

## Creating a media assignment in Moodle

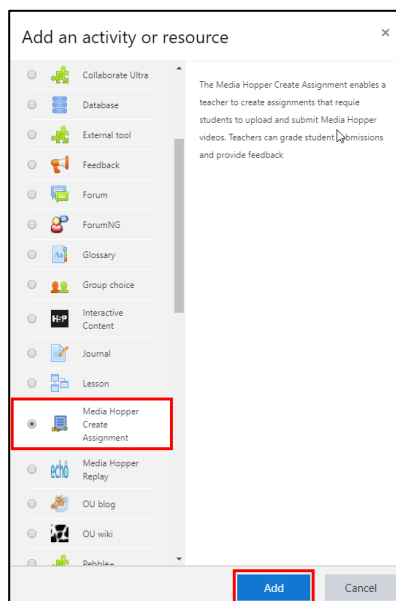

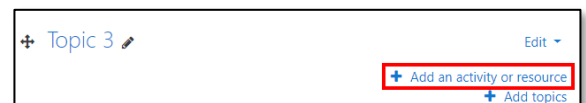

To allow students to submit content from their Media Hopper account to your Moodle course, first you must create an assignment within the course.

You will need to be a Teacher on the course (or have admin rights) to create the assignment.

1. From the left-hand Navigation menu navigate to your course.

2. Open the Topic you intend to add the media file to and click on **Add an activity or resource**.
3. Select **Media Hopper Assignment** and click on the **Add** button.

4. Enter a **Name** and **Description** for the assignment. It may be useful to include submission instructions or further information for your students.
5. Define assignment properties such as submission dates, grading, module settings and access restrictions.

6. Click on the **Save and display** button.

Your assignment will now be visible within your course.
