Installing the Desktop Recorder via Moodle

Media Hopper’s Desktop Recorder allows you to capture your screen, webcam or microphone and save the file to your Media Hopper library directly from within Learn. If the Desktop Recorder has not already been installed on your computer, you'll be asked to install it the first time you try to launch it.

Launching the Desktop Recorder

Media content stored within your Media Hopper account can be added to a new or existing Moodle course.

1. Select a course from the Navigation menu.

![Navigation menu]

2. Within a Topic, click on Add an activity or resource.

![Add an activity or resource]

3. Select Media Hopper Resource and click Add.

![Add media hopper resource]

If you require this document in an alternative format, such as larger print, please email Andy Todd at is.skills@ed.ac.uk or call 0131 650 4950.
4. Under the Video area, click on the Add media button.

5. When the Media Hopper My Media area opens, click Add New and select Launch Desktop Recorder.

The Kaltura CaptureSpace Desktop Recorder page will load. It contains system requirement information and download links for both Windows and Mac operating systems.
Windows installation

The following steps outline the Desktop Recorder download and installation process for a Windows computer. This can be either a managed desktop or personal computer. No administrative rights are required to install the application.

1. Check your system meets the requirements and click on the **Download for Windows** link.

2. When the dialog box appears, click **Save File**. Select a location to save it to and click **Save**.

3. Locate and open the installation file to start the process.

4. Another dialog box will appear on screen when the installation is complete. Click **OK** to close it.

5. Reload the content area within Learn and choose **Build Content > Kaltura Media**.

6. Click on the **Add New** button and select **Launch Desktop Recorder** from the list.

The Desktop Recorder will now open on screen.
Mac installation

The following steps outline the Desktop Recorder download and installation process for Mac users.

7. Check your system meets the requirements and click on the *Download for Mac* link. Your file will automatically download to the *Downloads* folder.

8. Drag the *Kaltura CaptureSpace Desktop Recorder* app onto the *Applications* folder to copy it to this location.

9. Once the installation is complete, reload the Content Area in Learn and choose *Build Content > Kaltura Media*.

10. Click on the *Add New* button and select *Launch Desktop Recorder* from the list.

11. When the security warning appears (this warning message will only appear if your downloads are set to ‘Mac App Store’ only), click on the *Open* button.

The *Desktop Recorder* will now open.
